Projects

This. Social Media| https://github.com/JayG92/thissocialmedia | https://pacific-earth-73860.herokuapp.com/

Using React, MongoDB, Node, and express we created a social media space with unique profiles and an authenticated login.

Restaurant Ordering| https://github.com/KPJBuchik/Project2 | https://rocky-earth-06157.herokuapp.com/

A collaborative project created at the University of Arizona Web Development Bootcamp built with HandleBars.JS, MySQL, JQuery, and Express. A restaurant ordering system with authentication.

Professional Experience

Server

2017 – 2019

Milk and Honey, Scottsdale, Arizona

Managed inventory by keeping a detailed count of products. Demonstrated hospitality and accommodated the individual needs and requests of customers to create a positive dining experience.

Office Clerk

2014 – 2016

Somerset Power, Phoenix, Arizona

Supplemented companies income by creating online sales listing for a wide range of technical products. Updated companies inventory within their intranet using Microsoft Excel and edited website copy for improved search engine optimization.

Education

Full Stack Web Development Bootcamp Certificate, University of Arizona, Chandler, Arizona

Three month intensive full time class focused on learning technologies related to full stack web applications.

Bachelor's of Arts in History Arizona State University, Tempe, Arizona

GPA: 3.6
